3   What did you like most about the Webinar?

Content and the Team.

4   What could have been improved or better?

1- presentation or slides could be shared as download instead of online. the online is not clickable. also the notes section of the slides is of important learning to me.

2- Sharing back the recording for those who couldn't make it. Or for those who want to refresh their memory about the topic. For instance, my laptop died in the last couple of minutes. I couldn't get what was presented.

3- Ram, Camera stream was covering some of the presentation text. Sometimes I could have guessed what is behind. I presume beginners won't guess it.

4- The time is a bit late in most of the webinars. It would be nice if you avail the recordings + the slides even someone couldn't make it for any reason.

5- Ram presented some reports as use cases. Usually he does, we would like to get a link for the reports or public link of the troubleshooting instance. As localhost is considered local to the presenter only. This way we can practice ourselves after the webinar.
